Software engineering

DevOps

- Docker
- Kubernetes
- Git
- GitHub Actions / GitLab CI
- Cloud (AWS/Azure/OVH)
- Unit & functional testing

Hard skills

- Java
- PostgreSQL, MySQL, NoSQL
- Python
- REST APIs
- C
- C++
- JavaScript / TypeScript
- CSS
- HTML

Project Management

Expertise

- Agile Method
- Scrum
- Power BI
- Project Lifecycle
- Audit
- Risks identification
- Stress Management
- RETEX Communication

Soft Skills

Soft skills

- Situation adaptability
- Teamwork
- Sociable
- Meet deadlines
- Plan and organise tasks

Lucas ZIVAN

Software Engineer and IT Management

In my last year of the computer science engineering program at EPITA Paris, I am looking for an end-of-studies internship or a permanent position as an Tech Lead / IT Consultant / Product Manager, starting February 2027.

Qualifications and training

Computer Science Engineer.

EPITA, Le Kremlin-Bicêtre From Sept. 2024 to Aug. 2027

Major: Global IT Management

Exchange Semester in Computer Science and Management

Shibaura Institute of Technology, Tokyo, Japan From Sept. 2026 to Jan. 2027

- Management Of Innovation and International Marketing
- Advanced Cognitive Ergonomics and Introduction to Affective Computing

Preparatory classes

Lycée Camille Guérin, Poitiers From Sept. 2022 to Jun. 2024

General Baccalaureate

Lycée Guy Chauvet, Loudun From Sept. 2021 to July 2022

Professional training

Full Stack Developer Internship

Asmodee, Boulogne-Billancourt From Sept. 2025 to Jan. 2026

Development of a multi-LLM AI Platform for Asmodee employees (over 800 users):

- Built an LLM-powered file generation service. Benchmarked 3 models and cut the error rate from 13% to 4%
- Integrated Mistral OCR, DeepL and Whisper voice dictation into a FastAPI/LangChain backend
- Took backend test coverage from 0 to 88% (Pytest, Tox, GitHub Actions CI/CD)
- Shipped a Projects feature and a full responsive and localization overhaul (Vue.js 3, Pinia, Tailwind CSS)

Freelance Developer as Self-employed

Lucas ZIVAN, Paris Since Dec. 2025

Self-employed as fullstack developer and project manager

- Scoped client needs into phased roadmaps (Jira, GitHub Projects), key technical decisions and UX mockups (Figma)
- Designed APIs and backend architectures with AI integration (POC for detecting manufacturing process drifts for writing annual reporting)
- Set up Docker environments, automated tests and CI/CD pipelines, and delivered handover documentation so clients can run the product independently

Projects

Aurora International Academy Fictional Request for Proposal Response

- Led product design for a RFP: PWA suite for a school, competing against other teams
- Defined a 3 phase product roadmap and key technical decisions
- Produced Figma-based UX mockups and coordinated a 5 person team

TinyX a micro version of the X social network.

- Built in a team of 14 in Java with Quarkus, TinyX is a project designed to master high traffic microservices. It integrates Redis (pub/sub), ElasticSearch, and Neo4J

EASY.Q SaaS Digitalization Platform for Restaurants

- SaaS product for restaurant digitalization: QR code digital menus, AI waiter chatbot
- Designed and deployed a production grade architecture using FastAPI/PostgreSQL/Redis backend and React/Vite frontend on OVH

Strategic Business Simulation

- Managed a fictional robotics company through 8 simulated quarters as part of EPITA's GITM curriculum
- Built a full strategic Excel dashboard to guide pricing, production and market decisions
- Led Corporate Social Responsibility strategy across the simulation
